A frontend and AI engineer who has owned products from planning through operation. I define problems by watching where the product is actually used, and check in the numbers that the change helped.

EXPERIENCE

AimBe Lab

2025.07 — Present

Associate, full-time · SaaS planning · Frontend · AI integration

- My Feed** — digitised farm orders kept on paper and KakaoTalk, and brought in SAM2, cutting AI classification error from 10% to 3%.
- Raised weekly visits from 2–3 to 4 through GA4-driven improvements.
- Website rebuild** — turned an investor site into a B2B one, taking enquiries from zero to 4 calls and 5 online a month and helping close a contract.
- Designed a three-tier RBAC dashboard and set up GitHub Actions CI/CD.

The Innovators

2025.03 — 2025.06

Intern · Technical research

- StartupQT** — built the modular editor and review workflow for a quiz-authoring SaaS.
- Built the GitHub Actions / Docker / PM2 pipeline alone, with Nginx reverse proxy and HTTPS.
